## **SCF Brings Safety Works to Colorado River Region**

Nearly 1,000 people attended five SCF Arizona Safety Works Expos in 2007, which took place in Flagstaff, Mesa, Prescott, Tucson and Yuma. This year the series of educational safety events kicks off March 4, at the London Bridge Resort in Lake Havasu City for employers and employees working in Bullhead City, Kingman, Lake Havasu City, Parker and other areas of the Colorado River region.

Safety Works is designed for safety professionals, employers, workers and the people who are in charge of safety at their jobs. The conference features workplace safety information, networking opportunities with other safety professionals and classes that focus on workplace safety issues for the specific region of the state.

Classes are taught by experts in specific areas of safety. Seminar topics include such issues as preventing heat stress, fall protection, office ergonomics, accident investigation, fire and life safety and more.

Workplace-related injuries, illnesses and fatalities can have a devastating effect on families and a disastrous impact on the costs businesses must pay for workers' compensation insurance.

The goal at Safety Works is to provide information that will help save lives, prevent workplace injuries and to build a culture of safety throughout Arizona, because SCF Arizona believes the best return on workplace safety investment by any employer is that employees are able to return home to their loved ones each day after work.

Cost is \$37, which includes lunch. The London Bridge Resort is located at 1477 Queens Bay.

SCF Arizona is the state's largest provider of workers' compensation insurance covering nearly 70 percent of the Arizona's businesses.
